Pop Up Roller Lifters

Lunati lightweight pop up design roller lifters are ideal for the racers that need to change camshafts quickly or for quick cam changes on the dyno. The spring loaded horizontal bar design allows you to remove the cam without removing the intake manifold! The light weight design also reduces valve train weight with a pair of 72840 only weighing in at 100 grams.

Part Number	Application/Description	Diameter	Pushrod Seat Location
72400LUN	SBC POP UP HORIZONTAL BAR SOLID ROLLER	.842"	All Centered
72401LUN	BBC POP UP HORIZONTAL BAR SOLID ROLLER	.842"	All Centered

Vertical Bar Roller Lifters

Lunati vertical bar roller lifters are manufactured from premium materials and machined to exacting tolerances and heat-treated for maximum durability. Lunati's vertical bar lifters feature maximized lifter bore contact for less wear and material is removed from non-critical areas for a strong lightweight lifter. Lunati roller lifters are the #1 choice for racers and street machines alike.

Part Number	Application/Description	Diameter	Pushrod Seat Location
